

Dear Resident,

The Cat Action Team of PEI operates a trap-neuter-release program to control and care for the population of stray and feral (wild) cats on PEI. We will be trapping stray cats in this area in the near future.

Humane traps will be baited, and cats that are trapped will be taken to a veterinarian for vaccination, parasite treatment and neutering or spaying. The next day, these cats will be released back to the area where they were trapped.

Cats will also be tested for infectious disease, and those testing positive for feline leukemia or feline immunodeficiency virus will be humanely euthanised.

Please be advised that pet cats may be trapped by accident. We suggest that pet cats be kept indoors during this time. Cats wearing collars, if trapped, will be immediately released.

Dates and times of trapping in your area:
